Alice Anderson Opens Show at Almine Rech – The British-French artist has opened a new show in London—and it's worth your time. “Human / Non-Human Interactions” includes new copper wire sculptures and electrifying paintings made through Anderson’s “geometric dance” technique, which blends contemporary dance, kinetic art, and the influence of Nicolas Schöffer, “who attempted to create interactions between machine and human, robot and dancer,” according to curator Marie-Laure Bernadac.
