ALMINE RECH

Collection Exhibition

Ongoing until 2027 | Enea Baummuseum, Rapperswil-Jona, Switzerland

Gregor Hildebrandt's work *Lümmel*, (2023), is part of a series of large-scale sand-casted bronze sculptures in which chess pieces are enlarged exponentially, becoming independent sculptures with abstract geometrical volumes. This series is one of Hildebrandt's emblematic series of works.

With a height of 4,17 m, *Lümmel* is so far the largest ever produced of these sculptures and is currently shown at the Baummuseum Enea, in Rapperswil-Jona, Switzerland.
